Alacriti, announced the release of the OrbiPay biller direct software suite. OrbiPay is designed to help banks and large billers consolidate, collect and process payments across the enterprise.

Banks can implement the solution across their credit card services, retail services, auto finance, mortgage and consumer lending business units. OrbiPay is a Web-based, SOA solution that can be deployed in a variety of ways, according to the company.

Included in the suite are:

1. OrbiPay Enterprise: Allows banks and other large billers to capture, aggregate and process payments from multiple channels and business units.
2. OrbiPay Exchange: Designed exclusively for banks' treasury and cash management divisions to enable them to provide value-added bill payment services to their business customers that are billers.
3. OrbiPay Web: Allows companies to collect payments from their customers over the Internet in a biller-direct model.
