

Transform Your Organization

- Accelerate Patient Payments
- Improve Cash Flow
- Reduce Bad Debt

Collecting more of what is owed to your organization in today's environment of increasing patient responsibilities, higher write-offs and growing expenses has become very important. As consumers take on more responsibility for their healthcare, utilizing flexible electronic payment and administration services will have a positive effect on the financial health of your organization.

PatientCollect helps you deliver these services through secure web portals that automate patient payments, information and e-communication services — along

with other key aspects of the healthcare administration cycle. This unique Web-based solution will enable you to increase your revenue collected per patient, maximize cash flow, minimize items sent to collections and improve patient satisfaction.

Easy to setup and use, PatientCollect helps healthcare organizations of all sizes to electronically process and consolidate patient payments and information across multiple departments and disparate systems, quickly and efficiently, reducing costs and increasing revenue.
